What Do We Do?

Human Centric **Smart City** + **Mobility**

**Loyalty
(INSTORE)**

**Location intelligence
(Zeelo)**

**Fintech
(Wallet + Blockchain)**

HealthTech

PropTech

Seamless Collaboration with Public Sectors and Private Services

Intros

1. **Increasing use** of digital technologies and mobile apps to deliver government services
1. Many **challenges** faced by citizens in accessing and interacting with government services, such as cumbersome paperwork, lengthy processes, and security concerns
1. With the **iAM Smart** that is the digital ID of Hong Kong, this shall bring in the **benefits** in terms of efficiency, cost reduction, and improved citizen experience

Challenges in Public Sector Mobile Apps - Fragmented User Experiences

Bureaux/Departments

Complex regulations,
diverse user demographics

Increase adoption rates

Concerns related to security
and privacy

Protect citizen data,
comply with regulations,
and establish trust in
iAM Smart

Public

Fragmented user experiences, lack of user
engagement

Concerns related to security
and privacy

Eliminate the need for
physical paperwork

Overview of User Journey Design to Achieve Seamless User Experience

The effective implementation of user-centered design approaches government services can be more user-friendly to public and eliminate unnecessary steps

Best practices or strategies of a user-centered design

Understanding user expectations

Simplified Registration

Add Personalization - Peer Connect

Security

Best practices or strategies of a user-centered design

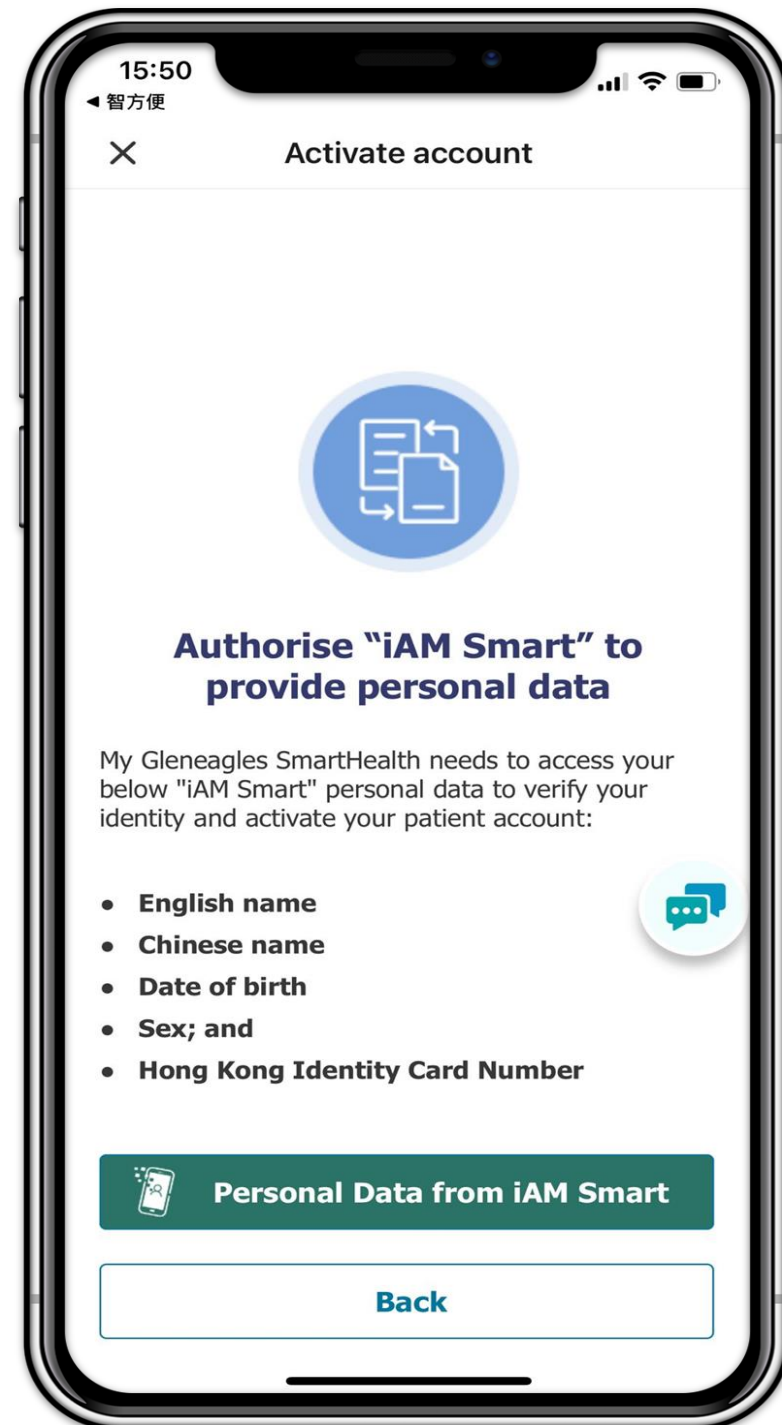

Understanding user expectations

1. Design thinking workshops
2. Iterative prototyping, usability testing
3. Surveys, Interviews
4. User Research
5. Involving citizens in the design process through co-creation workshops
6. Usability Tests

Best practices or strategies of a user-centered design

Simplified Registration

Best practices or strategies of a user-centered design

Activate the account with iAM Smart

Integration with the iAM Smart Authentication

allowing users to access comprehensive services through the mobile app **WITHOUT** the need to personally visit the hospital for identity verification

Best practices or strategies of a user-centered design

Providing iAM Smart for authorization

iAM Smart is able to...

Empower citizens by giving them control over their personal data

Facilitating access to services

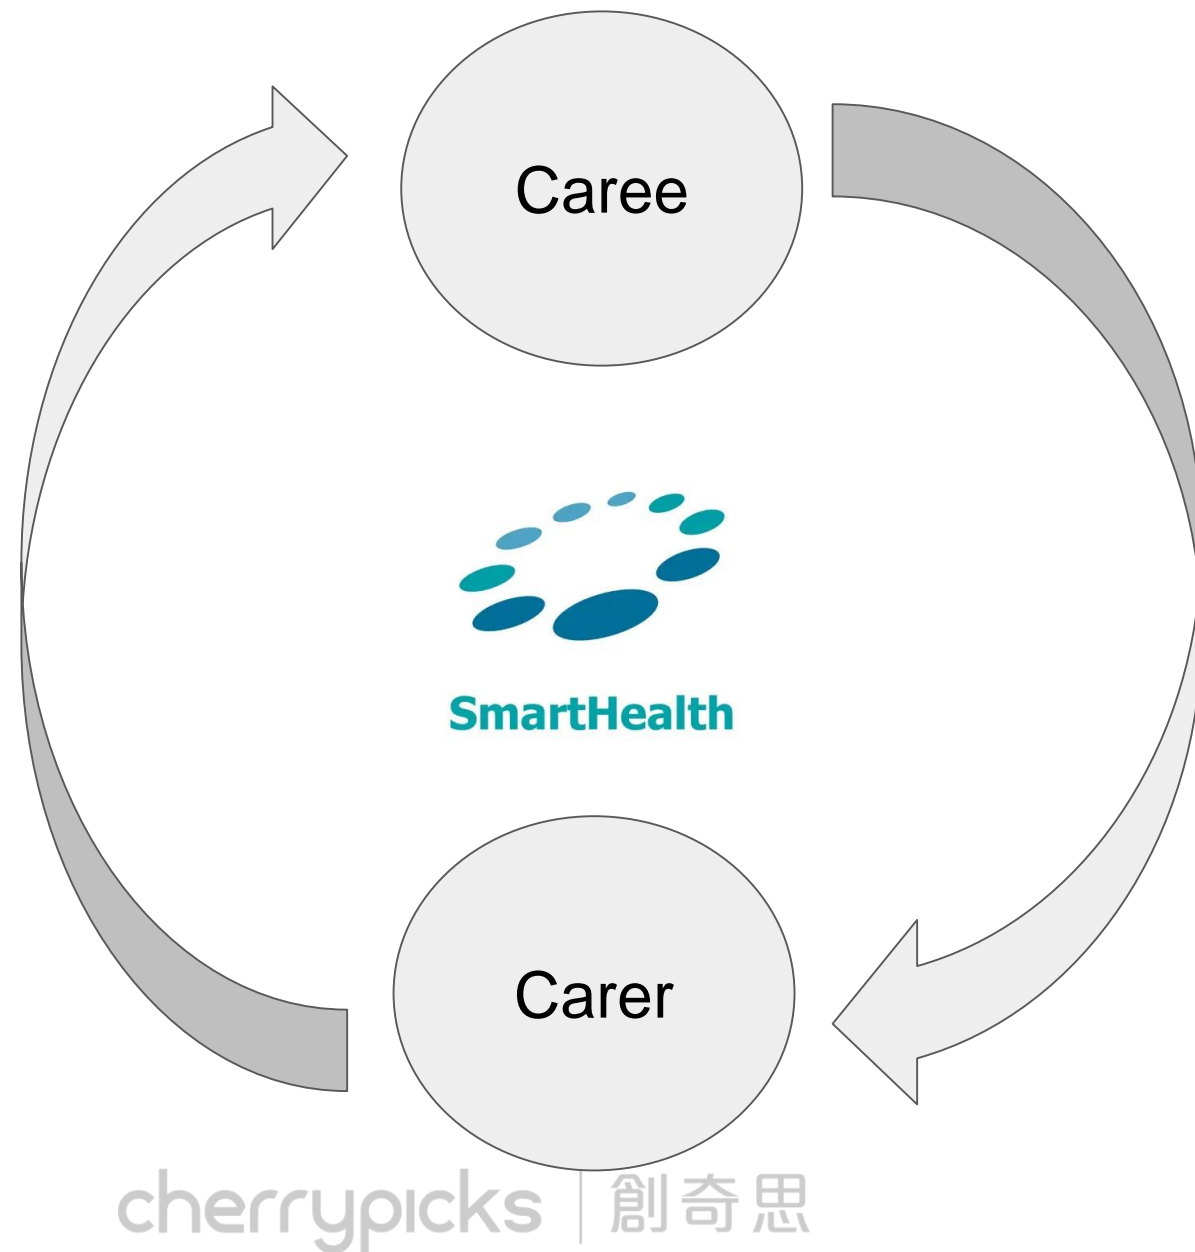

Enabling participation in the digital economy.

Best practices or strategies of a user-centered design

Add Personalization - Peer Connect

Mobile app facilitates secure and consent-based connectivity between 2 users.

Best practices or strategies of a user-centered design

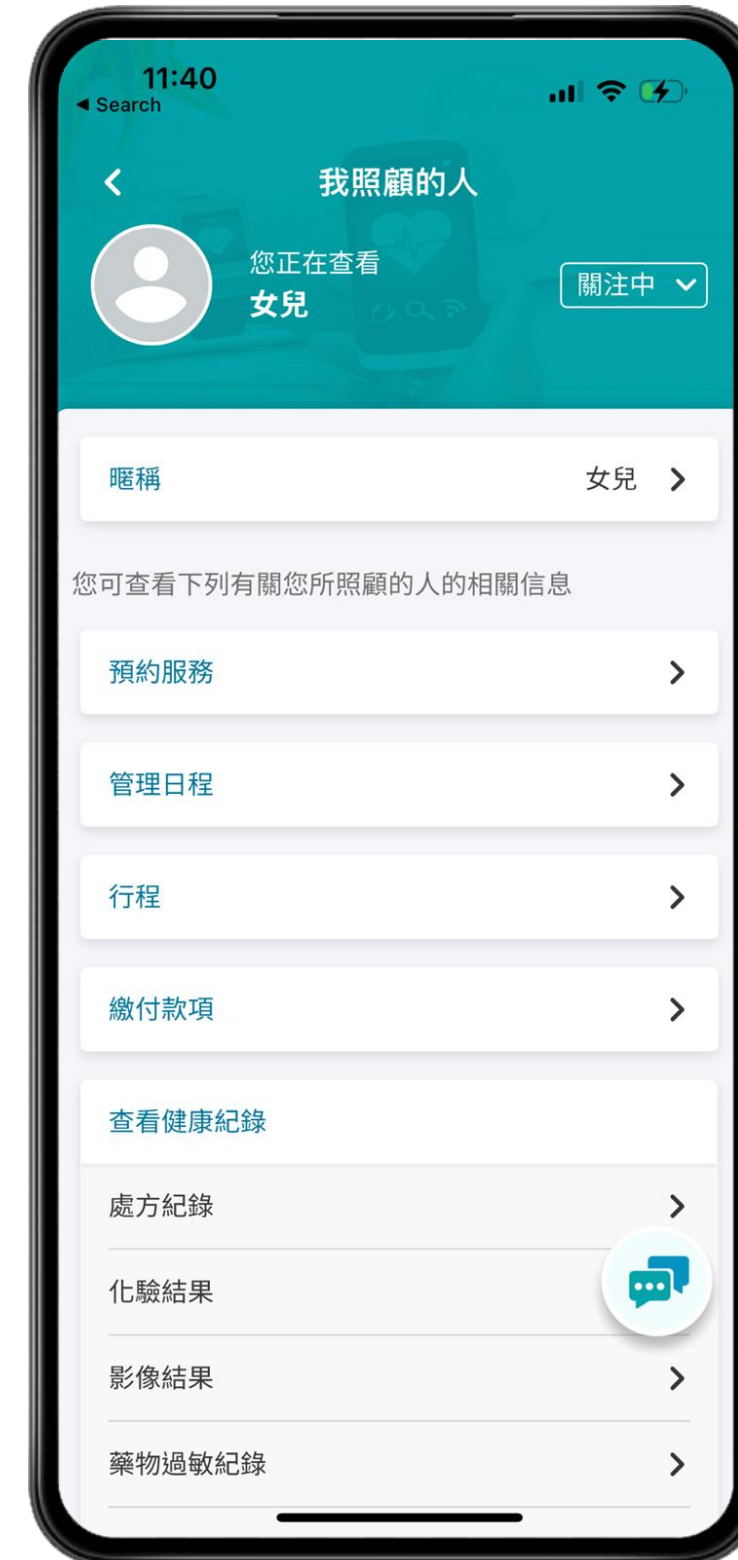

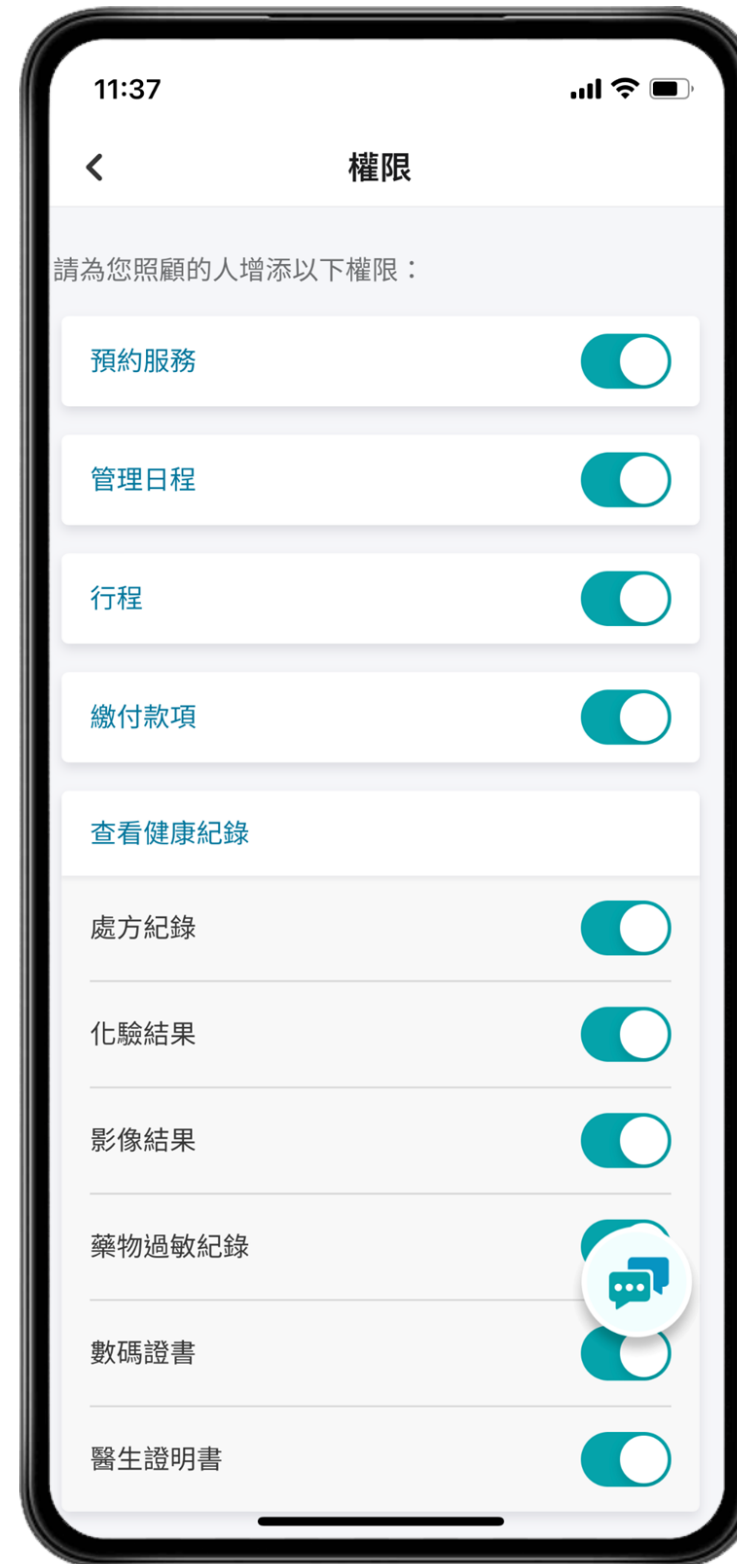

Add Personalization - Peer Connect

Gleneagles Hospital - Carer Module

Peer Connect between Mom and Daughter

Mom is able to manage and view

- Appointment bookings
- Prescription records
- Medication allergies
- Laboratory test results

Best practices or strategies of a user-centered design

Security - "iAM Smart" prioritizes citizen privacy and data security

With the use of iAM Smart:

Provide peace of mind to users that personal and sensitive data is protected during transmission and storage.

- HKID only involves during registration
- User consent and management within the "iAM Smart" system
